

## **West Haven City Contractor**

To become compliant with the requirements of our MS4 permit, we now require contractors to train in storm water regulations. For convenience, we have made these trainings available in an online learning system. You must complete these trainings before you begin construction.

Go to <http://westhavencity-accenagroup.talentlms.com/> and sign up for an account. Once you have created your account, go to the course catalog and select "Get this course" for the "Contractor Stormwater Training." Watch all six short videos and completed all six quizzes, the training is complete.

If you have already taken this training in another city, please email [support@accenagroup.com](mailto:support@accenagroup.com) and inform them your information needs to be added to West Haven City. Include your first and last name, username, company, and where you previously took the training in the email.

If you would like assistance with the learning system, please contact accenaGroup Talent LMS support at (801)615-2937.
