

**THE BIRTH OF WEST HAVEN CITY SPECIAL SERVICE DISTRICT**  
**and**  
**A CITY WIDE SEWER SYSTEM**

**ROBERT W HOLMES** is Chairman of the WHSSD Board. He was a major player in the creation of the District and a major force in bringing about the successful incorporation of West Haven City in July 1991. He also served as the city's first Mayor.

A long, and sometimes chaotic, road to provide a sewer system for residents of West Haven City began August 1993 with the creation of the **WWCSSS "West Weber County Sanitary Sewer System"**. That system was established through an inter-local agreement between West Haven City, Hooper Water Improvement District Board and Weber County Commission. Eventually the Weber County Commission and Hooper Water District chose not to be a part of the system and the WWCSSS was terminated.

Then, November 1995 the WHSSD "**West Haven Special Service District**" was established.

After hours, days, months and years of trudging through the hills and valleys of red tape and public opinion, the installation of a city wide sewer system, in coordination with Central Weber Sewer Improvement District, began March 2001 and was completed November 2002.

To date, all but a few residents, who could not be serviced, are now connected to the system. The goal is to provide service to all areas of the city in the near future.
